

MODEL SS-5000

PORTABLE OUTDOOR/INDOOR SCOREBOARD

Totally wireless system!

MODEL SS-5000 is a multi-sport, outdoor/indoor portable scoring system that helps keep everyone in the game. Day-Bright LED digits are easily readable from all over the field, even in direct sunlight. Wireless remote control is included.

Not just a scoreboard! The Edge SS-5000 is also a multi-purpose coaching tool with capabilities that include practice drill/circuit timer, precision stopwatch, countdown timer, elapsed time display, and time-of-day clock.

\$1,449.00

Multi-Sport Use: Soccer, Football, Basketball, Volleyball, Baseball, Softball, LaCrosse, Rugby, Racing/Running, etc.

FEATURES

Remote Controlled:

Highly reliable and responsive, the radio-controlled remote is easy to use and conveniently fits into a shirt pocket. A ref on the field can keep score and time as easily as someone on the sidelines. Running more than one SS-5000 at a time? No problem! Each system has its own dedicated radio channel.

Outdoor/Indoor:

The SS-5000 Scoreboard is a multi-purpose coaching tool and sport scoring system. Designed for outside and inside use, its Day-Bright LED digits are readable from over 300' away, even in bright sunlight. The internal battery provides a full day of operation on a single charge. For extended operation, display brightness can also be adjusted as needed (5 levels).

Multi-Sport Timing and Scoring:

Timing capabilities include countdown timer (for sports like football), count-up timer (soccer), circuit interval timer (for running practice drills), stopwatch (to 1/100th second) and time-of-day mode. Scoring, Period, and Start/Stop/Reset functions are all available via remote. Operation is intuitive, so formal training is not needed.

Loud Horn:

After each period expires the 106 dB horn sounds automatically, piercing through background noise like a ref whistle. The sound is easily audible across a playing field. Horn volume can also be adjusted or turned off.

Mounting Options:

The SS-5000 is designed to accommodate several mounting preferences. The built-in prop-rods help set up on the ground or other flat surface. For fence or wall mounting, the SS-5000 is equipped with hanging brackets. For raised mounting, the optional tripod kit (TRI-5000K) elevates to 7 feet with its easy "handle-crank" design.

- PORTABLE
- MULTI-SPORT
- MULTI-FUNCTION
- COACHING TOOL
- RECHARGEABLE
- DAY-BRIGHT DIGITS
- RADIO REMOTE

Model SS-5000 is recommended by Pop Warner and other youth organizations for football, soccer, hockey, running and other sports and recreational activities.
